TOWERKLENE SAF-T-24

TOWERKLENE SAF-T-24 is a versatile, concentrated aqueous cleaning solution formulated for use in pressure spray and immersion/soak wash applications. **TOWERKLENE SAF-T-24** is completely safe for use on ferrous and non-ferrous metals. It is a neutral pH cleaner making it very safe to use by operating personnel. In some cases disposal will be less costly since the pH does not need to be neutralized. **TOWERKLENE SAF-T-24** typically stays very clean in use providing increased washer sump life.

USAGE

TOWERKLENE SAF-T-24 is normally used at concentrations of 3% - 15% and at operating temperatures between 130°F and 160°F. The cleaner concentration should be maintained by adding **TOWERKLENE SAF-T-24** to make-up water at 1/2 the target concentration. It provides in-process rust protection if not rinsed from the parts. Parts that are cleaned with **TOWERKLENE SAF-T-24** and then rinsed should be coated with a water displacing rust preventive such as **RUSTBEAT 373** for extended corrosion protection.

BENEFITS

- Safe For Operating Employees
- Versatile Cleaning Solution
- Multi-Metal Safe
- Extends Washer Sump Life
- Excellent Spray or Immersion Cleaner
- Washer Fluid Runs Cleaner
