

OBJECTIVE:

- **Increase Weld Integrity**
- **In-Process Rust Protection**
- **Improve Anti-Spatter Characteristics**
- **Cost Reduction**
- **Improve Operator Work Area - Odors**

COMPONENT:

Automotive Body Parts & Custom Exhaust

OPERATION:

Weld Assembly in Multiple Locations

MATERIAL:

CRS

APPLICATION METHOD:

Spray

POST PROCESSING:

Alkaline Wash and E-Coating

PREVIOUS LUBRICANT:

Aerosol Spray

RESULTS:

- **Weld Spatter easily removed**
- **Excellent In-Process Rust Protection**
- **No Issues with Welding**
- **50% Cost Reduction**
- **Lighter/Cleaner to work with**
- **Overwhelming Operator Acceptance**
