Engineered Solutions

Bottom Line Results

Innovation & Technology

Our team of expert Chemists formulated Tower's Roll Forming products through innovation and advanced technology, creating exceptional performance characteristics in every product. From synthetics to soluble oils to vanishing compounds, Tower's Roll Form product line is engineered for results, execution and safety that leads to...

Superior Performance

Performance

Our ROLL FORMING lubricants provide superior performance and lubricity for a variety of metals in ROLL FORMING applications. Tower formulates with the highest quality ingredients to increase sump life, eliminate build-up on rolls and improve throughput while providing excellent rust and stain protection.

Product Lines

ROLLFORM coolants are specifically engineered for Roll Forming operations. Especially designed for recirculating systems, the entire ROLLFORM product line is balanced to provide extended sump life and formulated for various materials including ferrous, non-ferrous and coated surface materials used in a variety of industries and applications.

A Must Try!

SAF-T-VANISH lubricants are made using ingredients derived from renewable resources. They are formulated to replace vanishing oils made with hydrocarbon solvents that contain VOCs and HAPs. This product line is designed for lighter Roll Forming operations and can be applied by roller-coater, micro-mist spray or airless spray systems. These lubricants provide the necessary degree of lubricity while being able to eliminate the need for cleaning prior to post-plating, painting and final assembly.

A cost saver!

Exceptional Value

- Formulated for Health & Safety First!
- Extended Sump Life
- Eliminate Cleaning
- Increased Performance
- No Build-Up on Rolls
